Out Area

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

¹ A + following a place name indicates that the place is also a false MCD; the false MCD name is not shown.

² In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a "99" suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.

³ A + following a block number indicates that the block number is repeated elsewhere in the block.

All legal boundaries and names are as of January 1, 1990 as tabulated for the Public Law 94-171 and Summary Tape File products. The boundaries also reflect the feature network and coordinates as of the Census 2000 geographic base. Since 1990 the Census Bureau updated the base from the North American Datum of 1927 (NAD27) to the datum as of 1983 (NAD83) and made numerous updates to the base features from those depicted in 1990. The boundaries shown on this map are for the Census Bureau's statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights or ownership or entitlement. Source: U.S. Census Bureau's TIGER database (Census 2000). Projection: State-based Albers's Equal Area U.S. DEPARTMENT OF COMMERCE Economics and Statistics Administration U.S. Census Bureau

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol only the highest level of these boundaries.

1 A "1" following a place name indicates that the place is also a false MCD; the false MCD may be an unincorporated place.

2 In 1990, the crews of vessels populated at sea was allocated to census tracts with a "98" prefix. An anchor symbol appeared on the 1990 maps locating a crew's vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the anchor.

3 A "3" following a block number indicates that the block number is repeated elsewhere in the map.

The diagram illustrates various types of boundaries and features in a landscape, categorized into four main groups:

- Highway:** Represented by a solid black line.
- Secondary Road:** Represented by a dashed black line.
- Jeep Trail/Walkway/Path:** Represented by a dotted black line.
- Railroad:** Represented by a line with cross-ticks.

On the right side, there are three additional labels with corresponding line styles:

- Pipe/Power Line:** Represented by a line with small circles.
- Ridge/Physical Feature:** Represented by a line with small triangles.
- Property/Tenure Line:** Represented by a line with small squares.
- Nonvisible Boundary:** Represented by a dotted line.

At the bottom, there are three boxes representing different types of areas:

- Mudflat:** A box with a blue background and white dots.
- Inset:** A box with a grey background and a black border.
- Out Area:** A box with a white background and a black border.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- ¹ A "*" following a place name indicates that the place is also a false MCD; the false MCD name is not shown.
- ² In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a "99" suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.
- ³ A "*" following a block number indicates that the block number is repeated elsewhere in the block.
